NAVANEETH A B

Bengaluru, India | +91 8310763006 | navaneeth20th@gmail.com | linkedin.com/in/-navaneeth-a-b

Summary

Public Cloud DevOps Engineer offering 3+ years of production experience managing scalable infrastructure across AWS and Microsoft Azure. Specialized in writing Terraform configurations from the ground up, establishing complete CI/CD solutions, and managing Kubernetes deployments. Adept at handling deep Linux troubleshooting, network routing, and reverse proxy configurations. Proven track record of delivering operational stability for mission-critical enterprise platforms within Agile, distributed cross-country teams.

Experience

Senior Consultant – DevOps / SRE 11/2025 – Current
Muraai Information Technologies Pvt. Ltd. *Bengaluru, India*

- Managed production cloud infrastructure across AWS and Azure for SIMS (Supplier Invoice Management System), a critical platform serving Fortune 500 clients in 73 countries, operating within an Agile, distributed cross-country team.
- Engineered and maintained Amazon Machine Images (AMIs) and Azure Virtual Machine images, executing regular patching of EC2 instances and Azure VMs to ensure strict security and OS compliance.
- Designed complex network architectures including AWS VPCs, Azure VNets, Security Groups, network ACLs, and Azure Firewalls to establish secure, isolated cloud environments.
- Configured and managed reverse proxy setups utilizing Azure Application Gateway for efficient traffic routing, endpoint management, and load balancing across high-availability workloads.
- Deployed and managed containerized applications using Docker and Kubernetes, handling cluster provisioning, YAML configurations, and day-to-day production operations.
- Authored Terraform configurations from the ground up to provision core infrastructure, paired with Ansible for robust configuration management across Linux and Windows environments.
- Established complete CI/CD solutions using Jenkins and GitHub Actions, writing custom YAML pipelines to streamline development, testing, and deployment processes.
- Resolved complex operating system and networking issues through deep Linux troubleshooting, minimizing downtime and maintaining production stability.

Associate Consultant – DevOps 05/2023 – 11/2025
Muraai Information Technologies Pvt. Ltd. *Bengaluru, India*

- Containerized 20+ legacy applications utilizing Docker and orchestrated secure deployments onto Kubernetes clusters.
- Built robust CI/CD pipelines in Jenkins and GitHub Actions, standardizing release workflows and eliminating environment-specific deploy errors by 60%.
- Implemented endpoint management, Network Security Groups (NSGs), and secure routing protocols across both AWS and Azure environments.
- Administered Linux and Windows systems, providing tier-2 support, performance tuning, and extensive log analysis during critical deployment windows.
- Streamlined infrastructure configuration management by integrating Ansible playbooks directly into automated Terraform provisioning workflows.

Technical Skills

- **Cloud Platforms:** AWS, Microsoft Azure
- **Infrastructure as Code (IaC):** Terraform, Ansible
- **Containerization:** Kubernetes, Docker
- **CI/CD & Version Control:** Jenkins, GitHub Actions, GIT
- **Operating Systems:** Linux, Windows
- **Networking & Security:** Reverse Proxies, Load Balancing, VPC, VNet, Firewalls, ACLs, NSGs

Internal Engineering Projects

Enterprise Multi-Cloud CI/CD & IaC Framework

- Architected a complete CI/CD solution from scratch utilizing Jenkins and GitHub Actions to deploy containerized microservices into internal test environments across AWS and Azure.
- Wrote foundational Terraform modules and Ansible playbooks to provision compute nodes, secure endpoints, and configure reverse proxies for internal engineering setups.

Automated Image Baking & Patch Management

- Engineered a custom automation pipeline to build, harden, and manage AMIs and Azure VM images, enforcing strict OS-level patching for Linux and Windows instances prior to production rollout.

Education

PSG College of Technology *05/2023*

B.E., Computer Science & Engineering *GPA: 7.9 / 10*
